Mickey:

The contents of these vac boxes have been removed. It is my understanding that the Estate is giving those boxes to C4 Environmental for the price of transportation to a cleaning facility, cleaning the boxes, and providing you with a certificate of cleaning for your records.

It is my understanding that these boxes will be shipped with a bill of lading with a copy of the original manifest where we sent the material to Veolia. It is also my understanding that these boxes will need to be placarded for the transportation to the cleaning facility. Could you confirm that this?

Thanks

Gary Moore
